

Browser window showing the Synology DiskStation web interface. The address bar displays the URL: `http://169.254.79.138:5000/?timestamp=1582320418#`.

The interface includes a sidebar with navigation options: Package Center, Configuratiescher, File Station, DSM Help, and Hardware en stroom.

The main content area displays the **Opslagbeheer** (Storage Management) section, showing the status of Volume 1 (Beschadigd) with a 67% progress indicator. The storage pool is identified as Opslagpool 1, using Synology Hybrid RAID (SHR) with a total capacity of 2.7 TB.

A table lists the storage pool details:

Opslagpool-ID	RAID-type	Totale capaciteit
Opslagpool 1 (Beschadigd)	Synology Hybrid RAID (SHR) (Met gegev...	2.7 TB

Below the table, the **Schijfinformatie** (Disk Information) section shows the status of the disks:

Gebruikte schijven	Ongebruikte schijven
1	1

The interface also includes a notification for **Systeem geluidsignaal herinnering** (System sound signal reminder) indicating Volume 1 is damaged.

The taskbar at the bottom shows various applications: Network, Facebook, DiskStation - Synol..., Postvak IN - Outlo..., Instellingen, Windows-beveiliging, Netwerkcenrum, and Synology Assistant. The system clock indicates the time is 22:36 on 21-2-2020.
