Media Server

? — ▢ ✕

DMA Compatibility

☑ Enable audio transcoding

Enable transcoder to play files with the below formats if they are not supported on your DMA.

    ☑ Downsample audio files during transcoding to provide better DMA compatibility

    ☑ FLAC/APE ☑ ALAC/AAC ☑ OGG ☑ AIFF

☑ Enable video transcoding

Enable transcoder to play files with the below formats if they are not supported on your DMA.

File extensions: rm;rmvb;mkv

☑ Enable customized MIME types

Enter customized MIME types to help DMA identify file formats. Customized MIME types will overwrite the default settings.

Customized MIME types: avi=video/x-ms-video,wav=audio/x-wav

Change the settings of UPnP/DLNA devices within LAN.

☐ Restrict access to Media Server for newly detected UPnP/DLNA devices
