Compatibility and Installation

1. DSM 4.2 will be the last DSM upgrade for all 9-series Synology NAS due to hardware capabilities.

2. DSM 4.2 can only be installed on Synology products running DSM 4.0 or later. Before starting, please log into DSM and go to **Control Panel** > **DSM Update** to install the latest available update.

3. The following packages must be updated to be compatible with DSM 4.2: VPN server, Mail Server, Mail Station, Video Station, Time Backup, Logitech Media Server.

4. Some features have special hardware requirements and are only available on select models.
